Contents of Vol. 123

Part 1

Invited Review

P. J. STATHAM. X-ray microanalysis with Si (Li) detectors 1

CHRISTOPHER S. CLAY and GEOFFREY W. PEACE. Ion beam sputtering: an improved method of metal coating SEM samples and shadowing CTEM samples 25

A. E. MÜLLER, L. M. CRUZ-ORIVE, P. GEHR and E. R. WEIBEL. Comparison of two subsampling methods for electron microscopic morphometry 35

MARGARET E. VAN STEVENINCK and R. F. M. VAN STEVENINCK. An X-ray microanalytical examination of precipitation methods for the ultrastructural localization of potassium in plant tissue. II. Tetraphenyl boron 51

J. F. BERTRAM and A. W. ROGERS. The development of squamous cell metaplasia in human bronchial epithelium by light microscopic morphometry 61

MADISON B. COLE, JR and JOAN ELLINGER. Glycol methacrylate in light microscopy: nucleic acid cytochemistry 75

J. C. ELLIOTT, S. E. P. DOWKER and R. D. KNIGHT. Scanning X-ray microradiography of a section of a carious lesion in dental enamel 89

FRANCIS T. ASHTON and FRANK A. PEPE. The myosin filament. VIII. Preservation of subfilament organization 93

TERJE ESPEVIK and ARNLJOT ELGSAETER. *In situ* liquid propane jet-freezing and freeze-etching of monolayer cell cultures 105

Short Technical Notes

R. J. SKAER. A new *en bloc* stain for cell membranes: tannic methylamine tungstate 111

WOLFGANG BUCHHEIM and ANN-MARIE HERMANSSON. A modification of the oil emulsion freezing techniques for freeze-etching studies of hydrogels 115

Part 2

Biological and Medical Scanning Electron Microscopy

Introduction 119

Ulf Brunk, V. Peter Collins and Erik Arro. The fixation, dehydration, drying and coating of cultured cells for SEM 121

Marjorie A. England. Applications of the SEM to the analysis of morphogenetic events 133

K. E. Carr and P. G. Toner. Scanning electron microscopy in biomedical research and routine pathology 147

K. E. Carr, R. Hamlet and C. Watt. Scanning electron microscopy, autolysis, and irradiation as techniques for studying small intestinal morphology 161

K. E. Carr, R. Hamlet, A. H. W. Nias and C. Watt. Multinucleate giant enterocytes in small intestinal villi after irradiation 169

Aaron Polliack. The contribution of scanning electron microscopy in haematology: its role in defining leucocyte and erythrocyte disorders 177

Haim Gamliel, Rachel Leizerowitz, Dorit Gurfel and Aaron Polliack. Scanning immuno-electron microscopy of human leukaemia and lymphoma cells: a comparative study of techniques using immunolatex spheres as markers 189

S. L. Goodman, G. M. Hodges, L. K. Trejdosiewicz and D. C. Livingston. Colloidal gold markers and probes for routine application in microscopy 201

N. D. Tolson, B. Boothroyd and C. R. Hopkins. Cell surface labelling with gold colloid particulates: the use of avidin and staphylococcal protein A-coated gold in conjunction with biotin and fc-bearing ligands 215

L. K. Trejdosiewicz, M. A. Smolira, G. M. Hodges, S. L. Goodman and D. C. Livingston. Cell surface distribution of fibronectin in cultures of fibroblasts and bladder derived epithelium: SEM-immunogold localization compared to immunoperoxidase and immunofluorescence 227

Book Review 237

Part 3

E. D. Salmon and David DeRosier. A surveying optical diffractometer 239

J. H. Dowson and S. J. Harris. Quantitative studies of the autofluorescence derived from neuronal lipofuscin 249

Horst Piller. The calibration of standards for the measurement of specular reflectance with a microscope photometer 259

H. U. Luder, W. Weilenmann and H. E. Schroeder. Application of morphometrical methods in studies of the mandibular condyle 271

R. van Venetië, W. J. Hage, J. G. Bluemink and A. J. Verkleij. Propane jet-freezing: a valid ultra-rapid freezing method for the preservation of temperature dependent lipid phases 287

A. Njegic and D. B. Williams. Precipitation induced by ion beam thinning 293

S. F. Baumann and D. B. Williams. A STEM/X-ray microanalytical study of the equilibrium segregation of bismuth in copper 299

B. Jehl, R. Bauer, A. Dörge and R. Rick. The use of propane/isopentane mixtures for rapid freezing of biological specimens 307

Nicole Roinel. Electron probe analysis of microdroplets: factors affecting the proportionality between measured X-ray intensity and concentration 311

Short Technical Notes

Robert L. Kruse. Crazes in osmium tetroxide stained styrene polymers 323

Steven L. Goodman. A pipetting device for staining electron microscopic grids 329

R. F. Egerton. Values of K-shell partial cross-section for electron energy-loss spectrometry 333

B. S. Batson and P. C. Lloyd. Automation of a microprocessor electronic flash for photomicrography 339

Rodney Coleman. Size determination of transparent spheres in an opaque specimen from a slice 343

Book Reviews 347

Rapid Publication

K. J. Davies and J. R. Garrett. Ciliated ductal cells in obstructive sialadenitis RP1
